**The Well-Trained Mind: A Guide to Classical Education at Home (Fourth Edition)** Susan Wise Bauer 2016-08-09 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by

step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with

force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge

math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.

*Building Academic Leadership Capacity*

Walter H. Gmelch  
2015-02-02 A clear, systematic road map to effective campus leadership development Building Academic Leadership Capacity gives institutions the knowledge they need to invest in the next generation of academic leaders. With a clear,

generalizable, systematic approach, this book provides insight into the elements of successful academic leadership and the training that makes it effective. Readers will explore original research that facilitates systematic, continuous program development, augmented by the authors' own insight drawn from experience establishing such programs. Numerous examples of current campus programs illustrate the concepts in action, and reflection questions lead readers to assess how they can apply these concepts to their own programs. The academic leader is the least studied and most misunderstood management position in America. Demands for accountability and the complexities of higher education leadership are

increasing, and institutions need ways to shape leaders at the department chair, dean, and executive levels of all functions and responsibilities. This book provides a road map to an effective development program, whether the goal is to revamp an existing program or build one from the ground up. Readers will learn to: Develop campus leadership programs in a more systematic manner Examine approaches that have been proven effective at other institutions Consider how these approaches could be applied to your institution Give leaders the skills they need to overcome any challenge The field of higher education offers limited opportunity to develop leaders, so institutions must invest in and grow campus leaders themselves. All

development programs are not created equal, so it's important to have the most effective methods in place from day one. For the institution seeking a better way to invest in the next generation of campus leaders, *Building Academic Leadership Capacity* is a valuable resource.

This book explores meaningful and effective use of student voice in urban school renewal efforts through strategies that include: surveys, interviews, focus groups, visual and video projects, social media, and student participation in governance. Chapters provide a definition of student voice, context for public schooling in the United States, and introduce a framework for including student voice in school renewal processes. Examples guide readers to implementation of the framework to include student voices in

diverse educational settings. Authentic voices of approximately 175 students interviewed by the authors express what it is that they really want from public schools and how pre K-12 educators can provide a structure for ongoing student participation in governance and the work of the school. The existing literature explores student characteristics such as poverty, cultural diversity, and what the experts believe students need public schools to provide. Within the research, urban public schools and technical reform are often explored and examined separately from conversations about what students want from schools, excluding opportunities for their voices and diverse perspectives to be heard. Listening to students describe

instances of bullying or teachers' low academic expectations provides educators with opportunities to address issues that impede student learning. The uniqueness of this framework for including student voice is that it provides multiple opportunities for students in any grade level to tell us what it is they want from public schools, and to make meaningful and lasting contributions to school renewal efforts.
